Dr. Tiiu Hess, MD, FRCSC

COVID-19 Safety Protocols for your Visit

Thank you for cooperating with the rigorous screening protocol to enter the clinic, to protect your fellow patients and our health care workers.

We kindly ask that you follow these rules when entering the office and for the duration of your stay:

- #1. Please wear your mask or face protection at all times.
- #2. Please wash your hands with hand sanitizer provided at reception and again when entering the exam room.
- #3. Please avoid touching your face while in the office.
- #4. Please avoid speaking while your doctor is directly in front of you (to minimize the risk of virus spread through aerosolized particles when you talk).
- #5. In the interest of minimizing spread of virus, your doctor will not speak until 6 feet (2 metres) away from you and may spend less time talking than usual.
- #6. If you have any questions directly related to your eye disease not answered by the doctor in person, please fill in your name and phone number below, and leave this sheet at the front desk as you leave. Our staff will contact you to arrange a follow-up phone call with the doctor to safely answer your questions.
